Maurice Ruffin

Raleigh-Durham, NC (100% Remote / Open to Travel) | Stephfan.Maurice.Ruffin@pm.me | 919 810 2606 | reeseruffin.dev | U.S. Citizen (Secret Clearance Eligible)

PROFESSIONAL SUMMARY

Software Quality Assurance & Test Engineer with 5+ years of experience planning, developing, and executing comprehensive test cases for web applications, REST APIs, and database-driven systems across Agile environments. Proficient in functional, regression, integration, and system-level testing, with deep expertise querying Microsoft SQL Server (MS SQL / T-SQL) for backend data validation and cross-system data integrity. Skilled in test management and defect tracking using Azure DevOps, TFS, and Jira, collaborating with developers to isolate root causes and verify resolutions. U.S. citizen eligible for Secret Security Clearance, HackerRank Certified Software Engineer, holding a B.S. in Software Engineering (GPA 4.00) with a proven track record delivering 1,400+ automated and manual tests across 12+ cloud production releases.

TECHNICAL SKILLS

Testing Methodologies & Types: Functional Testing, Regression Testing, Integration Testing, System-Level Testing, Black/White/Gray Box, Boundary Value Analysis, Equivalence Partitioning, Exploratory Testing, End-to-End (E2E) Workflows

Web & API Testing: RESTful API Testing, Postman (Collections, Assertions, Environments), Web Application UI Validation, Playwright, Cypress, Selenium, JSON/XML Payload Validation, Swagger/OpenAPI, HTTP Status Code & Response Header Verification

Database Testing & Data Validation: Microsoft SQL (MS SQL / T-SQL Querying, Stored Procedures, Joins, Aggregations), PostgreSQL, MySQL, Data Integrity Verification, Schema Validation, ETL/Data Migration Checks

Test Management & Agile Tools: Azure DevOps (Test Plans, Boards, Repos), Team Foundation Server (TFS), Jira, Xray, Confluence, Git, GitHub Actions, Agile/Scrum Ceremonies (Sprint Planning, Standups, Retrospectives)

Programming & Scripting: Python (PyTest, Requests), SQL, JavaScript, Java (JUnit), Bash/Shell Scripting, Docker, Linux/Windows Environments

PROFESSIONAL EXPERIENCE

Software Quality & Test Automation Engineer | Genesys | Durham, NC Oct 2021 to June 2026

- Planned, authored, and executed 1,000+ test cases across enterprise web applications, REST APIs, and database components, ensuring full requirement traceability and defect-free deployments across 12+ major cloud releases.
- Performed rigorous functional, regression, integration, and end-to-end system testing in fast-paced Agile sprints, actively participating in sprint ceremonies and driving continuous quality improvements.
- Validated complex database interactions and data integrity in Microsoft SQL and relational databases by writing advanced SQL queries, verifying joins, stored procedures, data consistency, and transactional rollbacks.
- Conducted API contract and functional testing using Postman and Python scripted harnesses, verifying HTTP responses, JSON payload structures, error codes, and backend state persistence.
- Logged, prioritized, and tracked software defects in Azure DevOps and Jira with detailed reproduction steps, logs, and screenshots; collaborated closely with development teams to verify fixes and prevent regressions.
- Automated regression suites using Playwright, Cypress, and Python integrated into CI/CD pipelines, accelerating sprint release velocity while maintaining rigorous software quality standards.

Software Tester & Developer | Talent Tech South | Raleigh, NC Apr 2021 to Sept 2021

- Designed and executed 400+ positive, negative, and edge-case test scenarios for web applications and API services, applying boundary value analysis and equivalence partitioning to catch defects early.
- Queried SQL databases to validate CRUD operations, recorded defect lifecycles in TFS/Azure DevOps, and partnered with developers to reproduce and resolve software defects prior to customer acceptance.

PROJECTS

Automated API & Microsoft SQL Database Integrity Testing Framework

- Built an automated testing suite using Python (PyTest) and Postman integrated with Microsoft SQL Server to validate API responses against database records, automatically asserting data integrity across multi-tiered workflows.
- Configured automated test runs in Azure DevOps pipelines with comprehensive defect reporting, HTML test execution summaries, and alert notifications for rapid bug resolution.

CERTIFICATIONS & CREDENTIALS

HackerRank Certified Software Engineer: Role Certification (Problem Solving, SQL, REST API) — ID: 0a284b636add (Earned Oct 2026)

HackerRank Verified Skill Certifications: SQL (Basic), Java (Basic), Python (Basic) — Verified Skills (Earned Oct 2026)

Clearance & Professional Development: Sole U.S. Citizen (Secret Clearance Eligible / Clearance-Ready); Active preparation for AWS Certified Solutions Architect

EDUCATION

ECPI University | Bachelor of Science in Software Engineering | GPA 4.00 July 2026

ECPI University | Associate of Science in Electronic Engineering | GPA 3.85 April 2016
